

PHP Conditional Statements & Looping Exercise

Lab :2 Date:7/1/2026

1. Write a PHP program to check whether a given number is **positive or negative** using if statement.
2. Write a PHP program to check whether a number is **even or odd** using if-else.
3. Write a PHP program to find the **largest of three numbers** using if-elseif-else.
4. Write a PHP program to display the **grade of a student** based on marks using conditional statements.
5. Write a PHP program to check whether a given year is a **leap year**.
6. Write a PHP program to display the **day name** using switch statement.
7. Write a PHP program to check whether a given number is **prime or not** using conditional statements.
8. Write a PHP program to print numbers from **1 to 10** using while loop.
9. Write a PHP program to print numbers from **1 to 10** using do-while loop.
10. Write a PHP program to print the **multiplication table** of a given number using for loop.
11. Write a PHP program to print **even numbers between 1 and 20** using for loop.
12. Write a PHP program to calculate the **sum of first n natural numbers** using loop.
13. Write a PHP program to find the **factorial of a number** using for loop.
14. Write a PHP program to reverse a given number using loop.
15. Write a PHP program to find the **sum of digits** of a number using while loop.
16. Write a PHP program to check whether a number is **Armstrong number**.
17. Write a PHP program to display **prime numbers between 1 and 100**.
18. Write a PHP program to count the **number of vowels** in a given string using loop and conditional statements.
19. Write a PHP program to print **Fibonacci series** up to n terms.
20. Write a PHP program to display the **largest element in an array** using loop and condition.
